

Fashion MNIST

Fashion MNIST 데이터셋

- 10개의 범주(category)와 70,000개의 흑백 이미지(28x28 픽셀)로 개별 옷 품목을 나타냅니다.

Fashion MNIST 분류 모델

```
fashion_mnist = keras.datasets.fashion_mnist
```

```
(train_images, train_labels), (test_images, test_labels) = fashion_mnist.load_data()
```

```
model = keras.Sequential([  
    keras.layers.Flatten(input_shape=(28, 28)),  
    keras.layers.Dense(128, activation='relu'),  
    keras.layers.Dense(10, activation='softmax')  
])
```

```
model.compile(optimizer='adam',  
              loss='sparse_categorical_crossentropy',  
              metrics=['accuracy'])
```

```
model.fit(train_images, train_labels, epochs=5)
```
