CS231n

CS231n: Deep Learning for Computer Vision

Stanford - Spring 2022

박 경 규

**https://cs231n.github.io/convolutional-networks/**

Table of Contents:

- Architecture Overview
- ConvNet Layers
    - Convolutional Layer
    - Pooling Layer
    - Normalization Layer
    - Fully-Connected Layer
    - Converting Fully-Connected Layers to Convolutional Layers
- ConvNet Architectures
    - Layer Patterns
    - Layer Sizing Patterns
    - Case Studies (LeNet / AlexNet / ZFNet / GoogLeNet / VGGNet)
    - Computational Considerations
- Additional References

Lecture 5:
Image Classification with CNNs

Lecture 6:
CNN Architectures

Lecture 7:
Training Neural Networks

Lecture 8:
Visualizing and Understanding

- 설명 참고 사이트
